

# Wizard2011

Reference Overview	
<div>Information<div>Close</div><p>This is an overview for the references for your tool. If you create a reference, it will be shown on the right side of the screen and you can select it in the dropdown menus in the center of the screen. If you want a described reference to be part of the final tool description, just select it in at least one dropdown menu. Defining references is optional and is not needed to create a valid .bs2-description of your tool. It is, however, recommended. References are created according to the BibTex-standard. If you want to create a new reference just use the "+" button at the right side of the screen. You can also edit or delete existing references.</p></div>	
References:	<div><div>Choose Reference</div><div></div><div></div></div> <div><div>References +</div><div>No References defined yet!</div></div>
