

Wizard2011

File Overview

Information

Close

This is an overview for the additional files of your tool. If you create a file description, it will be shown on the right side of the screen and you can select it in the dropdown menus in the center of the screen. If you want a described file to be part of the final tool description, just select it in at least one dropdown menu.

Creating files is optional and not mandatory for a valid tool description. It is, however, recommended. We distinguish files and image files. Files can be downloaded by BiBiServ users and are described in the output xml. Image files are uploaded onto the BiBiServ but their sole purpose is to be referenced in your html-pages describing the tool. Therefore they are not part of the output xml. If you want to create a new file description or upload an image file please use the respective "+" button. You can also edit or delete existing file descriptions or image files.
