Wizard2011

Basic Information

Information	Close

Please describe the basic information about your new tool here. The description and the extended content of your tool will be shown on the welcome page that is generated for BiBiServ2. You can edit these texts using the build-in microhtml- or mini-html-text-editor. The tooltip is the text any BiBiServ user will see when hovering a link to your tool with her/his mouse. The keywords are similar to tags in blogs: They should describe your tool briefly (e.g.: An alignment tool could have the keywords "multiple sequence alignment,DNA,DNA sequence alignment, alignment", etc.). As a separator you can use a ",".

Name: *

Short Description: *
